Extracem

Glass Ionomer **Luting Cement**

The average particle size of less than 5 microns ($<5\mu\text{m}$)

- For cementation of crowns, bridges, inlays, onlays, pins, posts and orthodontic appliances
- Low film thickness
- Radiopaque
- Releasing high fluoride
- Low particul size in order to tightly sealed cementations
- High wear and erosion resistance
- Excellent biocompatibility

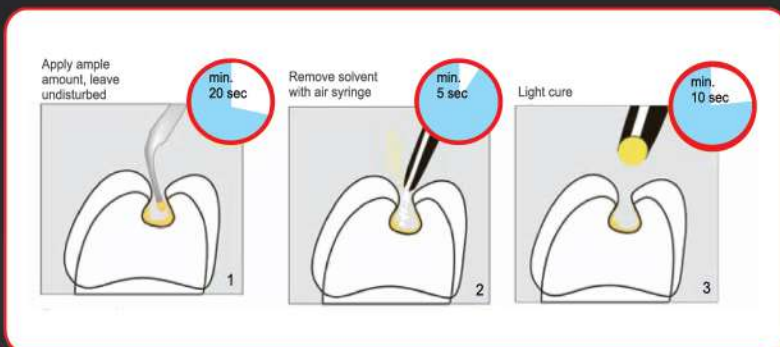

PREBOND SE

7th Generation

Self Etch Light
Curing Bonding
Agent

Prebond SE is a self-etching,
Light-Curing one component adhesive
which is used on direct and indirect
restorations.

ENDOPLUS

Material is a two component paste-paste dual syringe root canal sealer based on epoxy resin. It is the endodontic product for every dental practice and can be used for all established and more recent root canal sealing techniques.

- Long term sealing properties
- Outstanding dimensional stability
- Excellent Biocompatibility
- Self-adhesive properties
- Good radiopacity

- Dual-syringe design provides for accurate dispensing
- Is homogeneous, free of air bubbles and easy to mix (paste / paste)
- Provides a hermetic seal
- Penetrates superbly into the smallest lateral canals
- Does not stain teeth
- Has low solubility in soft tissue
- Has good apical tolerance
- Is radio-opaque

ADVANTAGES
ENDOPLUS

ZENIT

COMPOSITE

NANO CERAMIC COMPOSITE KIT

NANO COMPOSITE is a composite that can be cured with light and polished with high brightness. It includes ultra-thin radio-opaque porcelain filling that is used for the treatment of adhesive filling. It can be polished with high brightness.

Thanks to its ultra-thin particle filling there can be made homegenous restorations. Chameleon effect enable tehe composite to perfectly adapt to the structure of the teeth. It is compatible with DIN EN ISO 24 049 Zenit Nano Ceramic Composite is presented in easy to use syringe

ZENITCEM

ZENITCEM

SELF ASHESIVE COMPOSITE LUTING CEMENT – DUAL CURE

INDICATIONS

PERMANENT ADHESIVE LUTING OF INDIRECT RESTORATIONS (INLAYS, ONLAYS, CROWNS, BRIDGES, ENDODONTIC POSTS) MADE OF NOBEL METAL, NON-NOBLE METAL, PFM | ZIRCONIA, GLASS CERAMIC (CROWNS AND BRIDGES) | FIBER REINFORCED COMPOSITE (ENDODONTIC POSTS).

CHARACTERISTICS

- HIGH BOND STRENGTH ON ENAMEL, DENTIN, METAL AND CERAMICS
- SELF ADHESIVE
- RADIOPAQUE
- DUAL-CURE
- HIGH MECHANICAL PROPERTIES
